1. Background

With most of the population of Meghalaya living in rural areas, agriculture remains the main source of income and livelihood. Consequently, the importance of strengthening the agricultural sector is high. Thus, various projects have been initiated by the government to undertake end-to-end and focused crop-wise interventions, to bring in transformational changes in their value chains. Amongst them is value chain development of arecanut as Meghalaya is the 4th highest producer of arecanut in the country, with a significant proportion of farmers depending on arecanut for their farm incomes.

MBMA wants to set up community-based processing units for arecanut across the state. Thus, MBMA is looking for empanelment of agencies for installation, commissioning & maintenance of arecanut processing machines.
